

# Fueling Indiana

Better for business. Big for the economy.

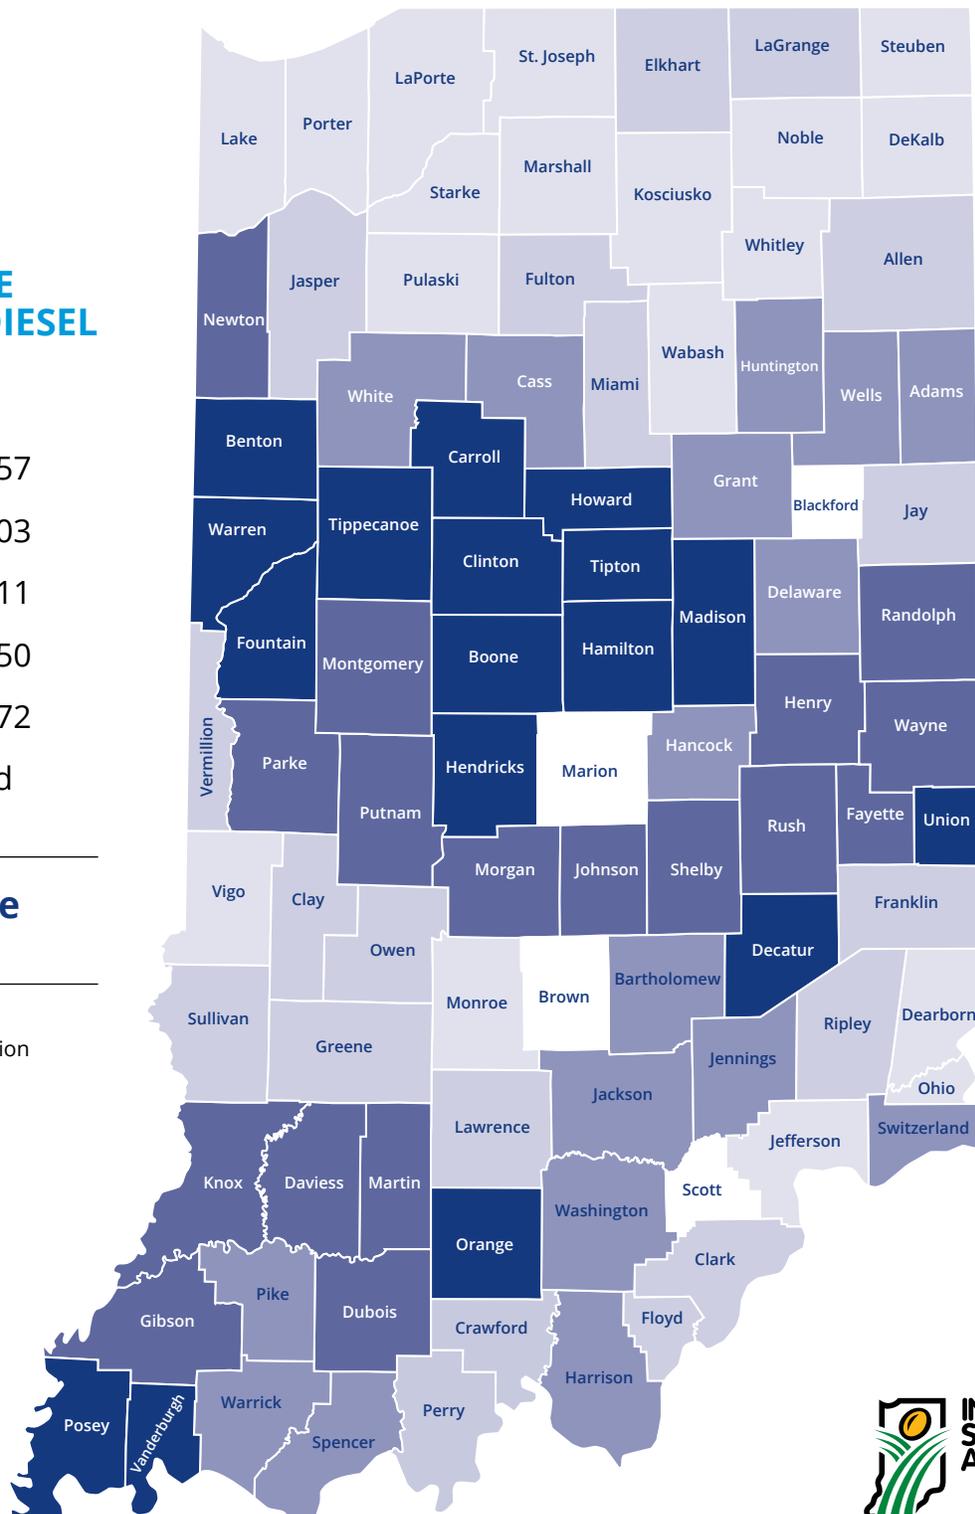

## PER ACRE VALUE ADDED BY BIODIESEL

(based on 63¢/bu and county yield data)

**58.0 bu/Acre**  
State Yield

USDA-NASS, Great Lakes Region

# BIODIESEL: Driving Our Economy Forward

AS A CLEANER BURNING FUEL that helps reduce CO<sub>2</sub> and particulate matter emissions, biodiesel has been proven as a better fuel for the environment. But did you know that biodiesel also **helps improve Indiana's economy?**

DEMAND FOR BIODIESEL increases the demand for soybean oil, **boosting the value of soybeans** and reducing the cost of soybean meal fed to poultry and livestock—a huge benefit to Indiana farmers.

ON AN EVEN LARGER SCALE, biodiesel helps create jobs, generate tax revenue and fuel local and nationwide economies, with **\$8.4 billion in national economic impact** in 2015.

## INDIANA BIODIESEL BY THE NUMBERS:

**7th largest**  
producer of biodiesel in the country\*

**107 million gallons**  
of annual production capacity\*

Biodiesel adds  
**11 cents/pound**  
of value to soybean oil, equal to  
**63 cents/bushel**  
or  
**\$36/acre**  
on average<sup>††</sup>

**289 million pounds**  
of soybean oil goes to  
biodiesel production\*\*

**3,200 jobs**  
supported for every 100 million  
gallons of biodiesel produced<sup>†</sup>

\* According to Indiana State Profile and Energy Estimates.

\*\* According to the Indiana Soybean Alliance.

† According to Renewable Energy Group.

†† Based on \$10/bushel price.
